

BOOK REVIEW

By William F. Doverspike

Clinical Psychology Doctoral Training Program, Emory University

Institutional Affiliation

William F. Doverspike, Ph.D., ABPP

Adjunct Professor, Emory University

Disclosure of Actual, Potential, or Perceived Conflicts of Interest

Doverspike is an adjunct professor at Emory University in Atlanta, Georgia. From 2003-2021, he also served as an Adjunct Professor at Richmond Graduate University, which is graduate training program from which the book's author graduated. Other than attending one webinar ("Recognizing & supporting brain differences in therapy: An intro to neurodiversity") presented by Murgado-Willard on October 25, 2021, Doverspike does not have any other relationship with the author. The reviewer does not receive any financial remuneration for this review from any author, publisher, university or other funding source.

Book Reviewed

Murgado-Willard, Kelli. J. (2024). *Neurodiverse couple therapy: A practical guide to brain-informed care*. Oxfordshire, England, UK: Routledge.

Review of Text (<100 words in 3 sentences)

"Written with passion and intellectual rigor, this practical guide pulls readers into a unique approach that integrates the intersection of couple therapy and neurodiversity. With a foundation built on scientific evidence and theoretical rationale, Murgado-Willard offers a broad conceptual overview as well as specific techniques that can be implemented by therapists. Based on a decade of experience as a licensed marriage and family therapist, Murgado-Willard's innovative approach to neurodiverse couple therapy will appeal to graduate students expanding their base of knowledge as well as to seasoned clinicians seeking to continue their professional development."
